

3D QUESTS TEST DOCUMENT

List of tests for 3D Quests project. Complete steps of each test to verify outcomes.

Last updated: 13 November 2025

GAME TESTS (open locally in Godot)

SWITCHING BETWEEN MODES

1. By default, the game opens in 'Edit' mode as indicated in the top left corner of the screen, saying "Mode: Edit (Press P to toggle)".
2. Press **P** on the keyboard. The top left corner should now say "Mode: Placement (Press P to toggle)" to indicate that the game is in 'Placement' mode.

OPENING THE ASSETS MENU

1. Press **P** again to set the game to 'Edit' mode.
2. Click the 'Assets Menu' button in the top left corner.
3. A menu with different asset names should appear. Click any of the buttons to select an asset.
4. Press **P** again to set the game to 'Placement' mode.
5. Hover the cursor over the map. The ghost object should have changed to the selected asset.

PLACING OBJECTS

1. Make sure that the game is in 'Placement' mode.
2. Click on any area of the screen to place an object. An opaque object should appear and stay in position even when the cursor navigates away from it.

ROTATING GHOST

1. Press and hold **Q**, **E**, **R**, or **F** to rotate the ghost object.

MOVING OBJECTS

1. Set the game to 'Edit' mode.
2. Hover the cursor over any object that has been placed.
3. Click on the object and move the cursor around the map. The object should follow the cursor.
4. Click again to place the object. The object should be placed and no longer follow the cursor.

DELETING OBJECTS

1. Click the 'Delete' toggle in the top left corner of the screen.
2. Click on any placed object. The object should disappear.

NAVIGATING THE MAP

1. Press and hold **W**, **A**, **S**, **D**, **Space**, or **LCtrl** to move around the map. The camera should move forward, backward, left, right, up, and down respectively.

SAVING AND LOADING THE MAP

1. Set the game to 'Edit' mode.
2. Click the 'Save' button.

3. Exit the game and reopen it.
4. Click the 'Load' button. The objects previously placed on the map should load onto the map again in the same position and rotation.

SERVER TESTS *(open on website)*

OPENING THE WEBSITE

1. Follow the instructions on the Github repository to prepare to load the website.
